

SIDNEY PRODUCCIONES

Business Presentation

WHO ARE WE?

The industrial dynamism and operational complexity of the refining complex demand strategic partners capable of anticipating every challenge with precision and absolute safety. In this demanding environment, Sidney Producciones C.A. stands as a cornerstone in the provision of scaffolding and comprehensive logistics solutions.

Sidney Producciones boasts a track record spanning over 31 years, backed by robust operational capabilities that allow for an agile response to the most critical demands of the oil and refining sectors. This strength is underpinned by the continuous improvement of our facilities and state-of-the-art infrastructure, designed to optimize service delivery and boost productivity in the workplace.

VISIÓN

To provide the best comprehensive service for the professional assembly of scaffolding and industrial access structures in refineries, delivering excellent quality, technical precision, and maximum safety to our clients in all work performed.

MISSION

To be the national market leader in the professional assembly of scaffolding structures and safe access infrastructure for refineries and industrial facilities, utilizing state-of-the-art technology systems for all types of projects and operations, thereby serving as the premier choice in the sector; all within an environment of collaboration, responsibility, and safety, while remaining committed to client satisfaction, the well-being of our personnel, and the maximization of business value.

TEAM WORK

We have a fully active and certified team, strategically deployed across the corporation's key work fronts.

+600

WORKERS

Logistical Autonomy and Scaffolding Systems

OPERATIONAL CENTER, SPECIALIZED VEHICLE FLEET,
AND CUPLOCK / LAYHER TECHNOLOGY

OUR FACILITIES

VEHICLES

Our units strictly comply with all current client regulations regarding free movement and operations within the refineries.

All our units are fully branded with our corporate identity and rigorously adapted to current oil industry standards and regulations, ensuring complete autonomy without reliance on third parties.

Cargo Units

Transport Units

Displacement Units

HIGH-TECH SCAFFOLDING SYSTEMS

We guarantee absolute technical flexibility to meet 100% of the required capacity.

Cuplock Scaffolding System

We have a large inventory of Cuplock system scaffolding to supplement and enhance current structural work at the CRP.

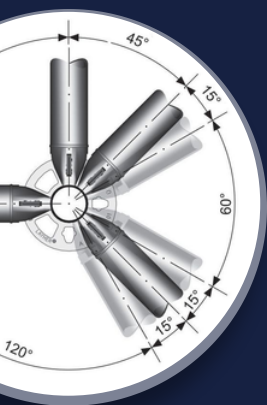

Preparation for Layher Technology

We have consolidated our position as specialists and exclusive representatives of Layher, driving the adoption of its new technologies within the domestic industry.

INNOVATION AND TECHNOLOGY

PRESENTATION OF THE SYSTEM AND HOMOLOGATION (20.02.2026)

As a step toward optimizing the country's industrial processes, Sidney Producciones—Layher's representative in Venezuela—presented the Allround multidirectional scaffolding system. This initiative, the formal processing and presentation of which began in February of this year, aims to raise safety and efficiency standards in national projects.

The technology enables execution up to 30% faster than traditional systems, positively impacting the country's hydrocarbon sector. Through this partnership, Sidney Producciones not only supplies equipment but also integrates advanced design engineering and certified training for Venezuelan technical personnel.

BENEFITS FOR VENEZUELA AND ITS INDUSTRY

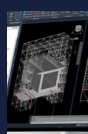

The system complies with global standards such as OSHA and EN 12810/12811, as well as the PDVSA SI-S-27 standard, supporting the "Zero Accidents" goal.

It includes a training and technical upskilling plan for scaffolders, developed in collaboration with local entities, thereby strengthening national human capital.

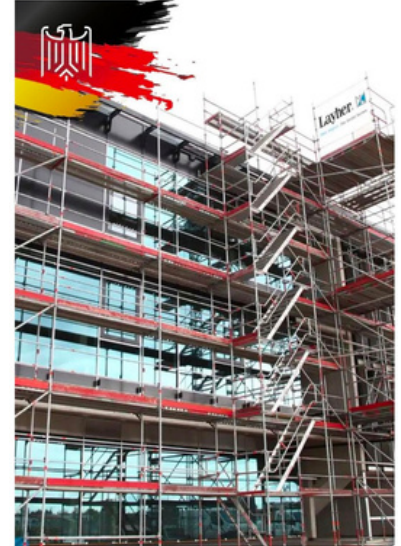

It reduces assembly time by 30% to 50%, allowing other trades (welding, insulation, inspection) to begin their work ahead of schedule.

Use of digital twins and specialized software (LayPlan/SIM) to prevent delays due to material shortages and ensure designs precisely tailored to Venezuelan infrastructure.

International experience in scaffolding systems

CUPLOCK / LAYHER TECHNOLOGY

HIGH-TECH SCAFFOLDING SYSTEMS

We guarantee absolute technical flexibility to meet 100% of the required capacity.

SIDNEY
PRODUCCIONES

Raising quality standards in every project and reaffirming our role in the development of national infrastructure.
